

STRATEGIC ROADMAP

Optimum Identity Management: Strategic Roadmap

IDENTITY MANAGEMENT

APPLICATION-CENTRIC IDENTITY MANAGEMENT

Security

Do you know who's looking at your data? Mergers and acquisitions, high turnover, and partner data sharing can render your data highly vulnerable. Oracle IDM solutions can fix this.

Lower IT Total Cost of Operations

Reduce maintenance costs and increase time savings and gain immediate value through reduced HelpDesk calls to reset passwords. Do you waste much time on this?

Compliance

Improve regulatory compliance, and reduce associated costs by leveraging reports that attest to who has access to your valuable data.

STRATEGIC ROADMAP VALUE PROPOSITION

Optimum's Identity Management Strategic Roadmap is designed to identify key shortfalls in your security practices against macro-level events, insider threats and regulatory compliance requirements.

We will identify measurable Return-on-Investment (ROI) which can be gained by streamlining your enterprise authentication processes, lowering your IT total cost of operations and reducing business risk.

DELIVERABLES

Our Identity Management Strategic Roadmap provides immediate value by delivering:

- Prioritized Inventory of Recommended Strategic IDM Initiatives ranked in sequence by measurable ROI-based business benefits
- Enterprise Assessment & High-Level IDM Design
- Logical IDM Architecture
- Physical IDM Architecture
- High-Level Project Plan and Labor Estimates for Implementing Oracle IDM

- Strategic IDM Rollout Plan aligned to corporate goals

NEAR-TERM BENEFITS TO YOU

Our Identity Management Strategic Roadmap will provide you with an accurate picture of the resources and time required to begin driving business value from Oracle's Identity Management solutions through:

- Review of existing processes and your ability to meet current compliance requirements
- A User Lifecycle Management approach, focused on leveraging Role Management in a Centralized Identity Store for enterprise-wide authorization
- Providing a Change Management Plan for the adoption of a Single User ID and Password to access all allowable IT and business resources
- Reduced administrative/help desk costs associated with managing user identities, passwords and authorizations
- Delivering a high-impact business case that ensures executive support for your proposed Identity Management deployment and delivers business value to your user community
